CASE STUDY NO. 4

TEAM NAME: MED-INTEL

Team Members: Ashu Gupta | Atharv Rawal | Nishant Kumar

College: Jaypee Institute of Information Technology (JIIT)

Proposed Solution: LabelIntelligence AI

THINK. BUILD. CREATE. WIN

Proposed Solution
LabelIntelligence AI™

An Agentic AI Powered Platform for End-to-End Medical Device Labeling Automation

TATA
TATA ELXSI

Multi-Source Data Ingestion

- Product Specifications (PLM/ERP)
- Existing Labels & Artwork
- Regulatory Documents (FDA, EU MDR etc.)
- Standards & Symbol Libraries
- Market & Language Requirements
- Past Approvals & Change History

AI Agent Orchestration Layer

Coordinates specialised AI agents across the labeling lifecycle

1 Regulatory Intelligence Agent

- Identifies applicable regulations (FDA, EU MDR etc.)
- Maps mandatory content, symbols and UDI rules
- Provides country-specific requirements

FDA · EU MDR · Global Submissions

2 Label Generation Agent

- Generates compliant label content using GenAI
- Creates multi-language versions
- Auto-generates artwork drafts using templates

3 Compliance & Vision Agent

- Validates mandatory fields, symbols, UDI and warnings
- Compares artwork using computer vision
- Checks content against regulatory rules and standards

Artwork Comparison (Computer Vision)

Compliance Check

- Mandatory Fields
- Symbols & UDI
- Text & Warnings
- Layout & Font Rules

4 Change Impact Agent

- Identifies affected products, labels, markets and languages
- Highlights required updates
- Generates impact report and change tasks

5 Workflow & Approval Agent

- Routes to right stakeholders (Regulatory, Quality, Mfg.)
- Tracks review, comments and approvals
- Maintains complete audit trail and version control

- In Review
- Approved
- Revision Required
- Released to Manufacturing

Human Oversight & Audit Trail

Regulatory, Quality Assurance and Manufacturing teams review evidence, approve and authorize release.

Complete Traceability · Version Control · Regulatory Compliance · Patient Safety

Outputs & Business Impact

- Faster Time to Market
- Higher Compliance Accuracy
- Reduced Manual Effort
- Lower Operational Cost
- Global Scalability
- Enhanced Patient Safety

THINK. BUILD. CREATE. WIN
